To

Charles E. Noronha, Esq., M.A.,
Secretary to the Government of Mysore,
Development Department, Bangalore.

Previous Diary No. 3344.

Sir,

With reference to Government Order No.D.4114-15/I.&.C. 181-39-12 dated 6th March 1940 sanctioning an additional grant of Rs.5,400/- for effecting certain alterations and additions to the buildings of the Lac & Paint Works, I have the honour to state that with a view to the future expansion of the Factory some modifications are considered necessary. I am submitting herewith a note on the modifications suggested, together with a copy of the Superintending Engineer's note, who was kind enough to inspect the buildings on the 13th instant. The cost of effecting these improvements has been kept within the sanctioned grant of Rs.5,400/-. I request you to be so good as to obtain the approval of Government for the revised proposals at an early date.

The revised allocation & the grant, involving as it is no extra cost, may perhaps be approved.

Submitted with a draft G.O. for orders

23/4

I have the honour to be,

Sir,

Your most obedient servant,

K Parthasarathi

Director.

atk).17.4.40.

Director,
Sandalwood Oil Factory.

N o t e.

Item No.1.-- The remarks of the Superintending Engineer, Mysore Division, are noted below:-

"Improvements to Government Lac & Paint Works, Mysore.

One of the items in the sanctioned estimate for Rs.5,400/-, is for extending the intermediate wooden platform, in the main building, by a length of 30 feet and at a cost of about Rs.1,600/-, to provide additional space for storing materials.

As an alternative to this item, the present Director suggests the fixing up of steel racks (12' x 5' in 6 tiers) for the same cost to provide the extra storage space.

This is suggested in view of the prospective expansion of the factory, when this building may have to be converted into machine shop, in which case, the new platform to be put up will have to be dismantled and will be a waste. On the other hand, if portable racks are put in, they can be shifted to any other place, when necessary.

Though the additional area obtained, for the same cost, will be somewhat less in the case of the racks, than by extending the platform, as per notes below, it appears more desirable to utilise the amount now on racks only, as it will admit of better arrangement of materials and articles. and also will not result in any wastage in case of future expansion, when the building may have to be converted to a machine shop.

The headway under the proposed platform is only 9½' which will be very low and stuffy for a continuous area of 50' x 40'. This disadvantage will be prevented in the case of racks.

p.t.o.

Note:-

	By extending the wooden platform.	By fixing steel racks 5 No. of each 12' x 5' in 6 tiers.
Extra accommodation obtained for a cost of Rs.1,600/-.	2 x 30 x 40 = 2,400 s.ft.	5 x 12 x 5 x 6 = 1,800 s.ft. "

My opinion is as follows:--

B. After housing six storage racks, a floor area of 30'x 40' is still available for storing heavy materials like linseed-oil barrels, ochres bags, etc. If at a later stage necessity arises to increase the number of storage racks, the space can provide accommodation for another set of 6 storage racks.

It is also a point for consideration if at a later date this hall where storage racks have now been housed cannot be made use of as the main machine-room, in which case the racks can be removed to one of the zinc sheet sheds now being used as stores and manufactory.

II. The original proposal provides for the construction of a terraced building 20' x 24', leaving a gap of about 11' between the existing building. I consider that this small lane between the proposed extension and the existing building should also be covered by increasing the laboratory accommodation by another 20' x 11'. The extra cost is only about Rs.250/-.

III. It has been proposed to locate the storage shed and the drying platform to the north of the existing buildings as shown in the ground plan. The location of this shed and the platform has no bearing on the existing lay out of the buildings. It is therefore proposed to shift the location of the two existing sheds and build them in a line parallel to these sheds. Two plans - one showing the original proposals and the other showing the revised

proposals, are submitted herewith.

Director,
Sandalwood Oil Factory.
